## Hi, I'm Elena.

...a Website Designer with 6 years' relevant experience in Squarespace and WordPress site design. I have specialized in creating websites for private practices offering counseling services since 2018. Sites range in complexity from a few simple pages to larger sites with scheduling options. Each one lists services provided and offers contact forms.

SEO plays a large part in overall site design, since each practice's goal is to increase site traffic to gain more clients in their local areas.

Original and existing branding elements drive each site's look and feel.

## INDIVIDUAL > Individual Counseling

Our individual counseling services address these and other issues:

### Depression

If you are feeling a sense of hopelessness, having sleepless nights, noticing a lack of joy in activities, or struggling with day to day tasks you may be experiencing a depressive episode. Our clinicians will assess your symptoms and create a treatment plan to decrease these symptoms and improve your quality of life.

### Anxiety

Anxiety is a normal experience but there are times when it becomes a pervasive and disruptive emotion. The clinicians at ACCL can help you to identify unhelpful thoughts, learn ways of managing uncomfortable emotions, and help to create behavior changes that can help decrease symptoms.

### Life Transitions

Whether you are changing jobs, dealing with a breakup or divorce, experiencing the grief of a loss, or having any number of changes or transitions occur in your life, our counselors are here to help. We can help you manage all of the emotions and worries that come with change and assist you in making the best decisions for yourself.

### Family Relationships

Families can be one of the most supportive communities that we belong to and can also cause some of the most struggle in our lives. Effective communication, conflict resolution, and in therapy you can learn to explore family dynamics and how your family of origin as well as previous generations can influence your perspective of yourself and the world around you.

### Friend Relationships

Our friends become the family that we choose. Many of us are living in a city with little family around and rely heavily on the friendships we have cultivated throughout our lives. However, we all grow and change at different rates and friendships often feel the burden of these changes.

Our therapists can help you develop the communication skills to have a productive conversation about a conflict and with individual therapy or therapy with your friend present you can address these issues and help the friendship to grow and change in a healthy way.

### Work Relationships

When conflicts arise in the workplace the whole team suffers. We spend as much time, if not more with our co-workers and work partners as we do with our friends and family. These relationships can be very intense and impact our lives both personally and professionally.

Power differentials, creative differences, and differences in work ethics and values can make a work environment a toxic place with significant consequences. We can help to resolve conflicts and facilitate conversations between coworkers and work partners in a collaborative and supportive environment.

Premarital counseling is taking a proactive approach to your marriage. Would you like to strengthen your relationship with your fiancée and discover areas for further growth? Set your marriage up for success with premarital counseling.

## HOME

I founded my private Chicago therapy practice in 2008 as a way to form closer connections with anyone in need of mental health counseling. With over 15 years of professional experience, I pair an empathetic approach and a lively, collaborative style with real-world problem solving.

I am a licensed clinical social worker (LCSW) and work with individuals, couples, parents, adolescents and adults in Chicago who are experiencing any event causing an internal conflict or crisis. I'd like you to feel more comfortable in your own skin with less anxiety and self-doubt.

Sometimes it's tough to find clarity in a challenging situation. I will take an objective look and see how we may remove roadblocks together.

### FREE THERAPY CONSULTATION

I welcome the opportunity to hear from you and talk about a preliminary session. A free 10-minute consultation is given ahead of meeting face-to-face, just so we can decide if we're a good fit. When we first meet, I will listen with intent to whatever you feel like sharing. Then, we'll define your goals and find practical ways to get there.

"The very patterns that were so adaptive when we were children are the ones that, as adults, we must undo."

My sites work well for DJs and musicians, with a common design theme being clean simplicity. These projects are highly collaborative - each site is an expression of their creativity and style.

Embedded music players, videos, and links to their mixes / productions on all current platforms give the reader instant access to their talents.

Each site allows room for future content creation and updates to events - plus new music, the most important thing.
